

Fabric Roller Blind ORION

ORION

Fabric sunshading systems are getting more and more popular. It is due to their multifunctional usage. They serve as protection against sunlight or curious looks of passers-by. Thanks to the wide range of fabrics, roller blinds can be used as individual modern element in your interior.

The fabric on the shaft of the ORION roller blind is hidden in a box. This roller blind should be fixed on the window wings. Side guide rails keep the fabric in the right position and prevent the sunlight from penetrating into the room. The roller blind components can be delivered in seven colours incl. wood imitation.
