

# Fabric Roller Blind **TITAN**

## **TITAN**

Fabric sunshading systems are getting more and more popular. It is due to their multifunctional usage. They serve as protection against sunlight or curious looks of passers-by. Thanks to the wide range of fabrics, roller blinds can be used as individual modern element in your interior.

The TITAN roller blind is intended to be used in skylights. When retracted, the fabric on the shaft is not visible in the interior, it is hidden behind the roller blind frame. Side guide rails keep the fabric in the right position and prevent the sunlight from penetrating into the room. The roller blind components can be delivered in four colours incl. wood imitation.

# Fabric Roller Blind TITAN

## Illustrative photo

The roller blind components (bottom rail, fabric end profile, operating handle) are chosen to match the **extruded guide rails**

## Description

### Fabric roller blind:

- the fabric is hidden behind the upper profile
- extruded rails of the frame are 5 cm wide
- the fabric is wound on an aluminium shaft with diameter of 25 mm
- components are in standard colours: white, silver, wood imitation (light pine, dark pine)
- caps of corner connections and operating handle are plastic
- the fabric is kept tightened thanks to a spring mechanism
- the operation system enables to stop the blind in any position

### Manual operation:

- by pulling an operating handle on the fabric end profile

### CLIMAX fabric collection:

- consists of many kinds of fabrics of various categories
- you can choose from various fabrics: plain, patterned, curtain, with printing, with designs for children, with increased shielding effect, technical fabrics, or non-flammable fabrics
- when choosing a fabric, it is necessary to consider the direction of the pattern, max. fabric dimensions, max. roller blind dimensions (see the table with technical data)

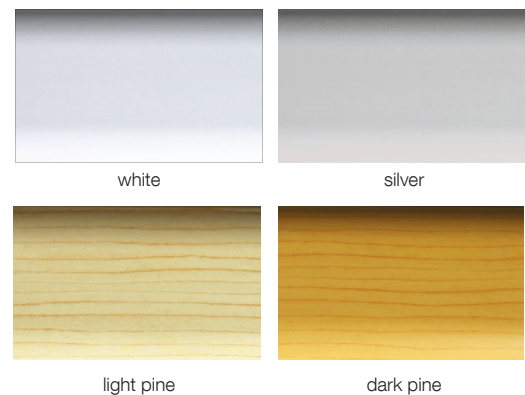

### Installation:

- the roller blind is fixed on the skylight wing, it is intended to be used in skylights

## Technical data

Limiting dimensions of roller blinds				
Roller blind	Width		Maximum height	Max. area [m <sup>2</sup> ]
	Minimum	Maximum		
TITAN	40 cm	120 cm	depends on the chosen fabric type	1.68

## Colours of components
